TOPIC : Who is heavier ?

And

Long short

F T R W S 11

1. 200 kg 200000 g. [put '<', '>' or '=']
2. 12000mm = 12 × cm
 - a)100
 - b)1000
 - c) 10
3. What will you use , to measure the width of a banyan tree ?
 - a) Measuring tape
 - b) ruler
 - c) weighing balance
4. How many mg are there in 25 g ?
 - a)10
 - b) 1000
 - c) 25000
5. Make a list of weight and find the total weight of the following:

2 sacks of rice weight 50 kg each , 2 pulses sacks of 5kg , 3 sacks of potatoes weight 20 kg , 5 bags of tomatoes each weight 5 kg .
6. At the boat dock, the red boat is 1900 cm long. The green boat is 500 cm shorter than the red boat. What is the length of the green boat?
7. Jenny has a rope of 50 m 60 cm. She cut that rope into 5 parts. What is the length of each rope?
8. Seeta weighs 38 kg 100 g, Geeta weighs 42 kg 273 g, Gitika weighs 37 kg 203 g. Find their total weight.
9. Add and convert it into kg and g :

12345 g ; 340 g ; 10989 g .
10. Multiply 15 km 335 m by 6 and convert it into m .
