

## COMPREHENSION-12

### Read the following passage and answer the following questions

Jute is almost entirely an Indian crop but it is cultivated on a large scale in Bangladesh, Pakistan, Brazil, Mexico, Japan, China, Argentina, Indonesia, Iraq etc. So great in its economic value that about four million farming families are engaged in the cultivation of jute in India. As an industrial crop it is quite cheap and in importance it is only next to cotton. The things made from the jute are also eco-friendly. Jute is used mainly for rough weaving. Various types of bags, ropes, sacks and covers are made of jute. The superior, long and glossy fibres are used for making carpet, twine curtains, cloth etc. jute-butts that is short fibres and pieces from the lower end of the stalks, are used in paper making. The white stalks are used widely in rural areas as fuel and material for walling or fencing.

1. Jute is entirely an \_\_\_\_\_ crop.
