

SATISH CHANDRA MEMORIAL SCHOOL
CLASS 3 (MATHEMATICS)
CH: 2 (WHERE TO LOOK FROM?)
TOPIC : LINE OF SYMMETRY
(RECAPITULATION 2)
F T R W S 15

1 . How many lines of symmetry does this shape have?

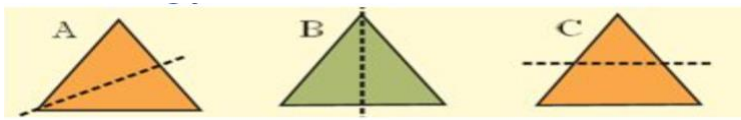

- a) 0 b) 1 c) 2 d) 4

2. Which of the following letters does not have a line symmetry, but has a rotational symmetry:

- a) H b) X c) I d) Z

3. Write the name of the lines of symmetry of the given fig..

4. Look at the given picture and write which are symmetrical and asymmetrical:

5. Draw a Rectangle and draw the lines of symmetry. Mention the name of the lines of symmetry .

6 What is called line of symmetry? How many different types of lines are there?

7. What is called symmetrical shape? And what is called asymmetrical shape?

8 . Give two examples of symmetrical shape.

9. Give two examples of asymmetrical shape.

10 . Write the alphabets having both vertical and horizontal line of symmetry
