SATISH CHANDRA MEMORIAL SCHOOL
Class: VIII   Ch: 1 (Rational Number)
Revision-2

1. Find the multiplicative inverse of 0.

2. Find the additive inverse of $\frac{2}{-3}$

3. Verify the statement is true or false : $\frac{13}{5} \div \frac{26}{10} = \frac{26}{10} \div \frac{13}{5}$

4. Subtract $\frac{-5}{6}$ from 0

5. Find a rational number between $\frac{1}{4}$ and $\frac{1}{3}$

6. Find a rational number between $\frac{-16}{7}$ and $\frac{-13}{6}$

7. Compare $\left|\frac{-62}{17}\right|$ and $\left|\frac{-15}{102}\right|$

8. Find 9 rational numbers between 1 and 2.

9. Represent $3\frac{4}{5}$ on the number line.

10. The product of two rational numbers is $\frac{-28}{81}$. If one of them is $\frac{14}{27}$, find the other.
