

Activity

\* Aim: Weaving with paper strips.

\* Materials required: Two different coloured paper (chart paper), glue/stapler, Scissor, pens.

\* Method:

At first take two different coloured chart paper. Then from each of the paper cut 10 to 12 pieces of paper strips of measurement (20cm x 2cm) [20cm length and 2cm breadth]. I have taken here blue and orange colour paper, you may choose different also. Now, you have to place both the paper strips by interlacing at right angles one by one to make a small mat like shape. Now, it is done. Use stapler or glue to cover all the sides.

\* Observation: This way it can be done very smoothly. This way people weave sets of yarn to make fabrics. It is done on looms [hand or power looms].
