

Sloth

It looks like a bear but is not. It is a sloth. It spends almost 17 hours a day sleeping while hanging upside down on a tree branch. The sloth eats the leaves of the same tree on which it lives. It hardly needs anything else. When it has eaten enough leaves from that tree, it moves to the nearby tree.

Sloths live for about 40 years and in that time they move around only eight trees. Once a week it comes down from the tree to relieve itself.

TICK THE CORRECT OPTION :-

Q.1) Which animal is mentioned in the above lines ?

- (a) A bear
- (b) A monkey
- (c) A sloth ☒
- (d) An elephant
