## English comprehension

### Revision (practice)

**Read the passage carefully and answer the questions given below:**

Elephants are the biggest animals that live on land .They have long noses called trunks. They have big ears that can flap like fans .Their skin is grey. They have short hair on their back and tails. They eat grasses and shrubs. They must drink many litres of water too. The trunk of an elephant is used to put food into its mouth. It is also used to greet one another. The baby elephant is called a calf. A calf weighs more than an adult human. Elephants are found in Africa and Asia.
