

- 
1. Identify terms which contain  $x$  and give the coefficient of  $x$ :  $5 + z + 2x$
  2. Identify terms which contain  $x$  and give the coefficient of  $x$ :  $9x + xy^2$
  3. Identify terms which contain  $x$  and give the coefficient of  $x$ :  $13xy^2 + 35$
  4. Identify terms which contain  $x$  and give the coefficient of  $x$ :  $14y^2 - 7yx$
  5. Identify terms which contain  $x$  and give the coefficient of  $x$ :  $y^2x + x$
  6. Identify terms and factors in the expressions:  $1.6ab - 4.2b + 6.8a$
  7. Identify terms and factors in the expressions:  $-ab + 2b^2 - 3a^2$
  8. Identify terms and factors in the expressions:  $pq + q$
  9. Identify terms and factors in the expressions:  $-8x + 6y$
  10. Identify terms and factors in the expressions:  $5y + 6y^2$
