# SATISH CHANDRA MEMORIAL SCHOOL 

CLASS: III SUBJECT: MATHEMATICS
WORKSHEET: 39

## WRITING THE STATEMENTS AND SHOWING THE WORKING OUT IS MANDATORY <br> WORD PROBLEMS:

1) Anaya has a pencil 10 cm long. What will be the total length of $\mathbf{2 0}$ such pencils? ANS: $\mathbf{2 0 0} \mathbf{c m}$
2) Neha has a 5 m long cloth. If she wants to divide it among 5 of her friends. What is the length of cloth each will get?
ANS: $5 \mathrm{~m}=5 \times 100 \mathrm{~cm}=500 \mathrm{~cm}$
$500 \mathrm{~cm} \div 5=100 \mathrm{~cm}$
3) Suraj's height is 340 cm . Rohan is half as tall as Suraj.

What is Rohan's height?
ANS:HALF means divided by 2
$340 \mathrm{~cm} \div \mathbf{2 = 1 7 0} \mathrm{cm}$
4) Rohini has a table 30 cm long. Shreya has a table double of Rohini's table's length. Find the length of Shreya's table.
ANS: DOUBLE $=2 \times$.....

## DOUBLE OF $\mathbf{3 0} \mathrm{cm}=\mathbf{2 \times 3 0} \mathbf{c m}=\mathbf{6 0} \mathrm{cm}$

5) Anil has a mango tree which is three times the height of his Tulsi plant. Length of the Tulsi Plant is 30 cm .Find the length of the mango tree?
ANS: THREE TIMES = 3 x ...
HEIGHT OF THE MANGO TREE $\mathbf{= 3 \times 3 0} \mathbf{c m}=\mathbf{9 0} \mathrm{cm}$
6) Sneha travelled 891 km . Roshni travelled one-third of Sneha's distance. Find the distance travelled by Roshni.

ANS: ONE THIRD = DIVIDE THE GIVEN NUMBER BY 3
Distance travelled by Roshni $=891 \mathbf{k m} \div 3 \mathbf{= 2 9 7} \mathbf{~ k m}$
