

SATISH CHANDRA MEMORIAL SCHOOL, CHAKDAHA

EVS CLASS V

CASE STUDY (UNSOLVED)

Do your best and things will work out!

When Sunita was five years old she saw pictures of Neil Armstrong landing on the moon. In 1969, Neil Armstrong was the first man to walk on the moon. Like any other child, Sunita was also fascinated. Sunita says that when she was a young girl she really loved sports and swimming. She was never too interested in studies. After high school Sunita wanted to become a diver. But she could not get into that course. Instead, she became a helicopter pilot. One day she found out that if she studied and trained for it, she could join the Space Mission. And that is what she did! In 2007 Sunita Williams set a new record for the longest space flight by a woman.

Sunita often gives her own example to tell children, "If you want something, but you get something else, do not give up. Do your best, and things will work out!"

When Sunita was asked by a child what would she like to do in the future, she answered, "I want to become a school teacher!" So that she could make children understand how science and maths are closely linked to our lives.

TICK THE CORRECT OPTION:-

Q.1) What did Sunita wanted to become after high school?

- a) Footballer
- b) Chef
- c) Diver
- d) Cricketer

Q.2) What Sunita became instead after high school?

- a) Helicopter Pilot
- b) Engineer
- c) Doctor
- d) Painter

Q.3) In 2007, Sunita William set which record?

- a) Deepest dive by a woman
- b) Longest space flight by a woman
- c) Highest peak climbed by a woman
- d) Fastest bike ride by a woman

Q.4) Who was the first man to walk on the moon?

- a) Albert Einstein
- b) Thomas Edison
- c) Sachin Tendulkar
- d) Neil Armstrong

Q.5) What Sunita wants to do in her future?

- a) Become a dancer
- b) Become an actor
- c) Become a school teacher
- d) Become a painter
