

## Class IV

### E. V. S

#### Case study

Nishant and its classmates visited to Botanical Garden. He found a big banyan tree looks like the hanging branches which are actually the roots of the tree. These grow down from the branch until reach the ground. He observed the roots are like pillars that provide strong support to the tree. This banyan tree also has roots under the ground, just as other trees have.

**1. Pillars like root in the banyan tree provide**

**A) less support to the tree**

**B) strong support to the tree**

**C) Bend the tree**

**D)None of these.**

**2. Hanging branches are**

**A) stem**

**B)Branches**

**C) Roots**

**D) None of these.**

**3. Botanical Garden is**

**A) A place where plants are cultivated for scientific, educational, and ornamental purposes.**

**B) A place where animals live.**

**C) Both A and B**

**D) None of these.**

**4.What is Radish?**

**A)root**

**B)stem**

**C) fruit**

**D) leaf**

**5.Roots perform which tasks for the plant.**

**A)absorb the water from the soil.**

**B) Firmly held the plant in fixed position.**

**C) Absorb minerals from the soil.**

**D) All the above**
