

Anirudh has typed the following text in Word.

The Solar System is huge and gigantic. It was formed about 4.6 billion years ago. In the Solar System, eight planets revolve around the sun. In addition to planets, the Solar System also consists of moons, comets, asteroids, dwarf planets, and dust and gas. There are five dwarf planets. They are Ceres, Pluto, Eris, Makemake and Haurnea.

He now wants to edit the document to make the following changes:

1. Add the text 'The Solar System' as the heading in the first line.
2. Delete the sentence "It was formed about 4.6 billion years ago."
3. Insert the text "**The names of the planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune.**" after the sentence "In the Solar System, eight planets revolve around the Sun."
4. Move the sentence "The Solar System is huge and gigantic." to the end.

Help Anirudh in making the above changes.
