

PRACTICAL HOME ASSIGNMENT

CLASS V

Ch-6 ACTIVITY ZONE (HW – 29)

ACTIVITY ZONE

You all know that animals with backbones are called vertebrates. The five classes of vertebrates are fish, birds, mammals, reptiles and amphibians. Collect pictures and information about vertebrates and design a PowerPoint presentation. Two sample slides for your reference are:

FISH

- The body of the fish is covered with scales.
- Fins help the fish to move through water.
- Fish uses gills for breathing.

REPTILES

- The body of a reptile is covered with hard scales.
- They breathe using lungs.
- The female lays eggs which are often buried in sand or in the earth to protect them.
- Examples of reptiles are crocodiles, snakes and lizards.

Create a Presentation using PowerPoint on 5 classes of vertebrates given above. Two sample slides are given; you can apply your own imagination, pictures, shapes, symbols etc. Create on your own computer/device and send screenshots, mentioning your name, class, section and roll in Computer Whatsapp group.
