

COMPREHENSION-8

Dolphins are intelligent aquatic mammals. Their level of intelligence is higher than that of many wild animals. They communicate with sound. Dolphins are very friendly towards humans. On many occasions, dolphins have been found saving human lives. Dolphins often chase away sharks when they try to attack swimmers. In many zoos across the world, dolphins put up beautiful shows. They obey commands and entertain the audience. Scientists are continuing their research on the brain of dolphins. In the near future it is thought that we shall be able to communicate with them smoothly.
